

# Handle Collection

## Introduction

At Flanagan Fittings, we are committed to offering quality products across our entire range. Our handle collection is sourced from both Belgium and Italy. By purchasing from within the EU, we avoid long lead times and have access to over 500 handle designs in up to 12 finishes.

Our latest stock collection of handles is designed to suit all current furniture trends. Traditional and hand painted kitchens can choose from our Porcelain, Traditional or Chrome collections. Modern styled furniture has seen a trend towards low profile handles which we now included in our range. The contemporary collection offers a wide selection to cover most kitchen designs and the new Copper collections brings a traditional finish on a contemporary design.

Metakor, based in Belgium, is one of the leading European designers and manufacturers of handles. With over 30 years experience Metakor has been creating trendsetting handles to decorate furniture of all types and styles. Featuring innovative designs, excellent quality and a wide range of finishes, the Metakor range of handles can offer the finishing touch to kitchen cabinets.

During the last years of the former century, Metakor got introduced in contemporary fittings. Through the acquisition of Duhber, Metakor right away right away absorbed a premium modern range, and a new and vast customer group. Over the last fifteen years, those ranges were amplified in cooperation with an international team of designers. Today, these ranges have become the most important and largest part of the Metakor collection. New models are continuously introduced in the most actual finishes with full attention to high quality standards.

Citterio Line is a company specialising in the production of handles and accessories for the furniture industry. The great variety of models, the guarantee of quality, the strong entrepreneurial spirit and the passion of a team of people with the same values has led the company to a process of growth which has earned Citterio Line a place of distinction in handles manufacturing.

The design, creativity, style and quality of all products are absolutely "Made in Italy".

The wide range of products includes zamak handles, knobs and modular handles made of aluminium, brass, iron and steel and aluminium profiles which can be produced in a wide range of lacquered and galvanised finishes. 70% of Citterio Line's production is made up of handles with a modern design but the range also includes traditional and contemporary styled handles which create simple and refined solutions.
